

Membuat upload foto siswa

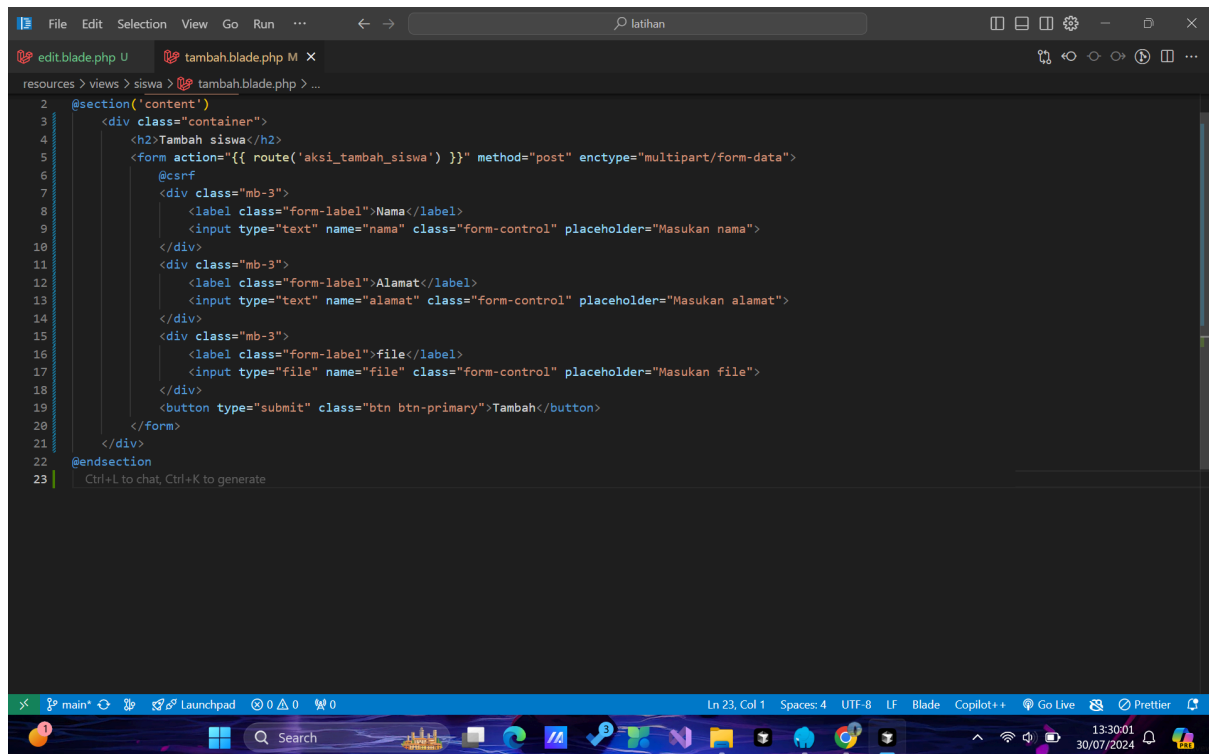

buka file di folder siswa/tambah.php

lalu tambahkan attribute **enctype="multipart/form-data"** yang digunakan dalam tag <form> ketika ingin mengirimkan file dari formulir HTML.

```
1 You 48 seconds ago | 1 author (You)
2 @extends('layouts.index')
3 @section('content')
4     <div class="container">
5         <h2>Tambah siswa</h2>
6         <form action="{{ route('aksi_tambah_siswa') }}" method="post" enctype="multipart/form-data">
7             @csrf
8             <div class="mb-3">
9                 <label class="form-label">Nama</label>
10                <input type="text" name="nama" class="form-control" placeholder="Masukan nama">
11            </div>
12            <div class="mb-3">
13                <label class="form-label">Alamat</label>
14                <input type="text" name="alamat" class="form-control" placeholder="Masukan alamat">
15            </div>
16            <button type="submit" class="btn btn-primary">Tambah</button>
17        </form>
18    </div>
19 @endsection
```

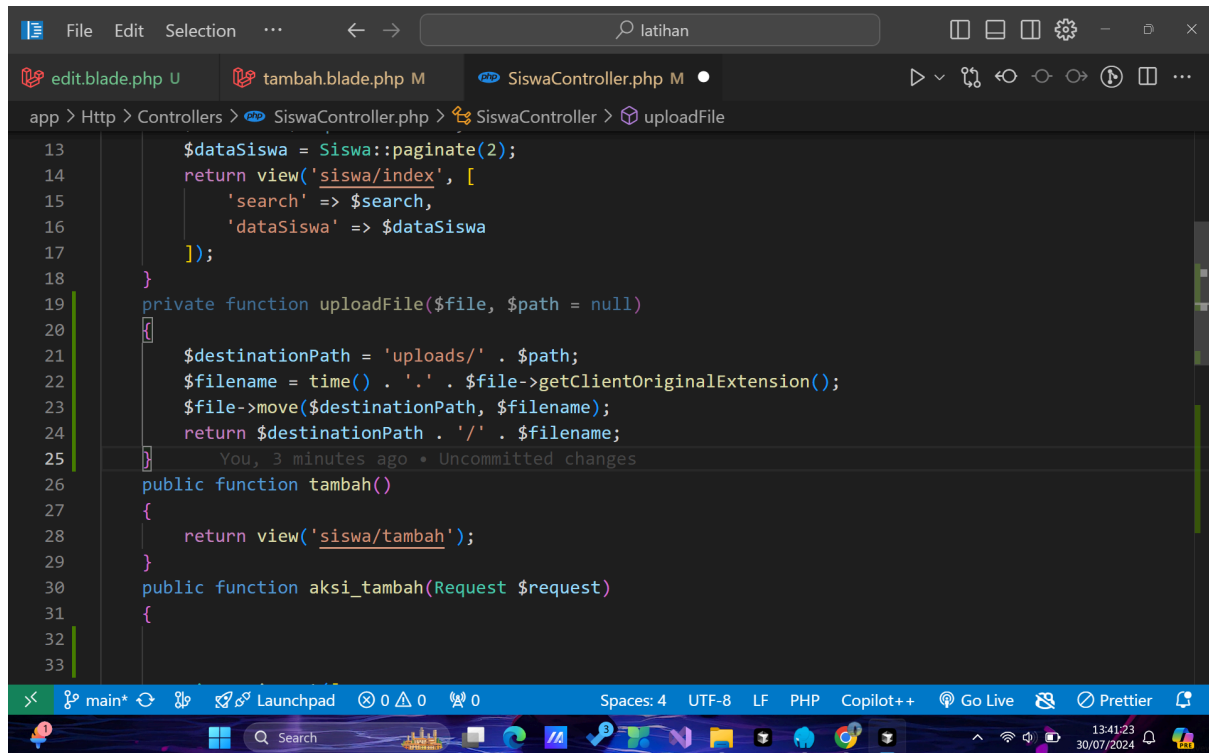

lalu buat form input file nya

```
2 @section('content')
3     <div class="container">
4         <h2>Tambah siswa</h2>
5         <form action="{{ route('aksi_tambah_siswa') }}" method="post" enctype="multipart/form-data">
6             @csrf
7             <div class="mb-3">
8                 <label class="form-label">Nama</label>
9                 <input type="text" name="nama" class="form-control" placeholder="Masukan nama">
10            </div>
11            <div class="mb-3">
12                <label class="form-label">Alamat</label>
13                <input type="text" name="alamat" class="form-control" placeholder="Masukan alamat">
14            </div>
15            <div class="mb-3">
16                <label class="form-label">file</label>
17                <input type="file" name="file" class="form-control" placeholder="Masukan file">
18            </div>
19            <button type="submit" class="btn btn-primary">Tambah</button>
20        </form>
21    </div>
22 @endsection
23
```

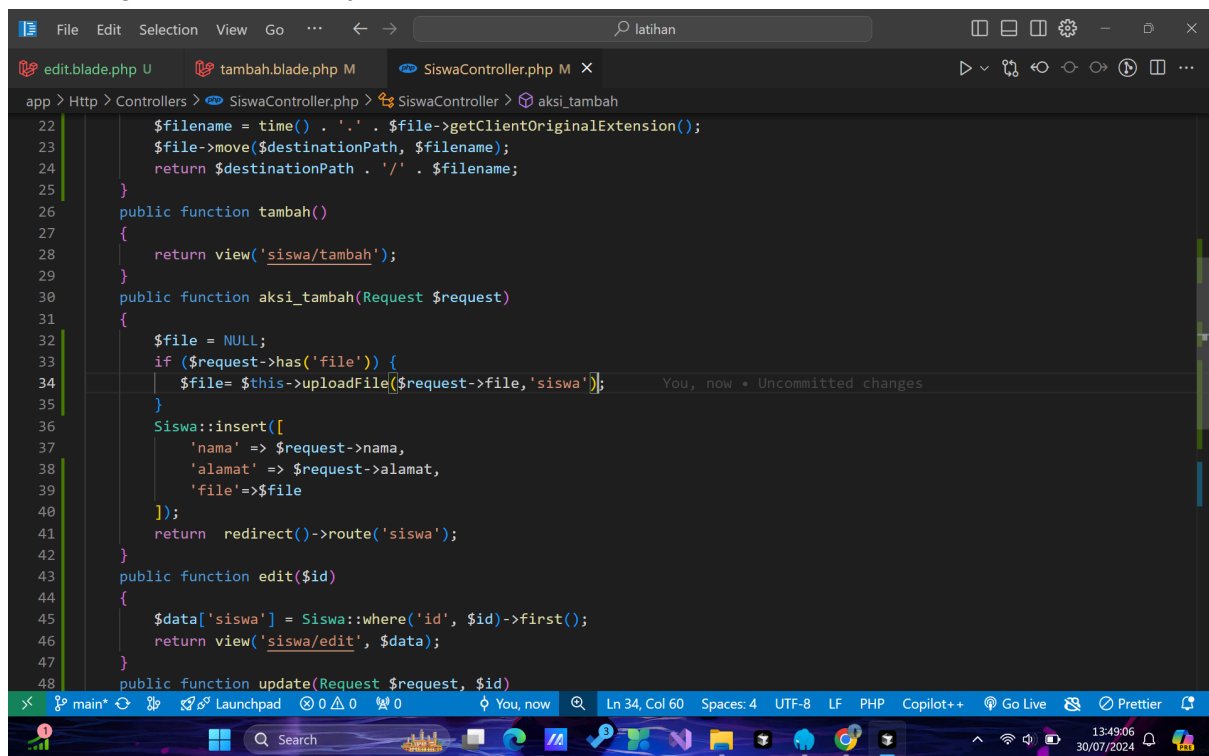

buka file **SiswaController.php**

buat fungsi `uploadFile`

```
File Edit Selection ... < -> latihan
edit.blade.php U tambah.blade.php M SiswaController.php M
app > Http > Controllers > SiswaController.php > SiswaController > uploadFile
13     $dataSiswa = Siswa::paginate(2);
14     return view('siswa/index', [
15         'search' => $search,
16         'dataSiswa' => $dataSiswa
17     ]);
18 }
19 private function uploadFile($file, $path = null)
20 {
21     $destinationPath = 'uploads/' . $path;
22     $filename = time() . '.' . $file->getClientOriginalExtension();
23     $file->move($destinationPath, $filename);
24     return $destinationPath . '/' . $filename;
25 }
26 public function tambah()
27 {
28     return view('siswa/tambah');
29 }
30 public function aksi_tambah(Request $request)
31 {
32 }
33
```

ubah fungsi `aksi_tambah` jadi seperti ini

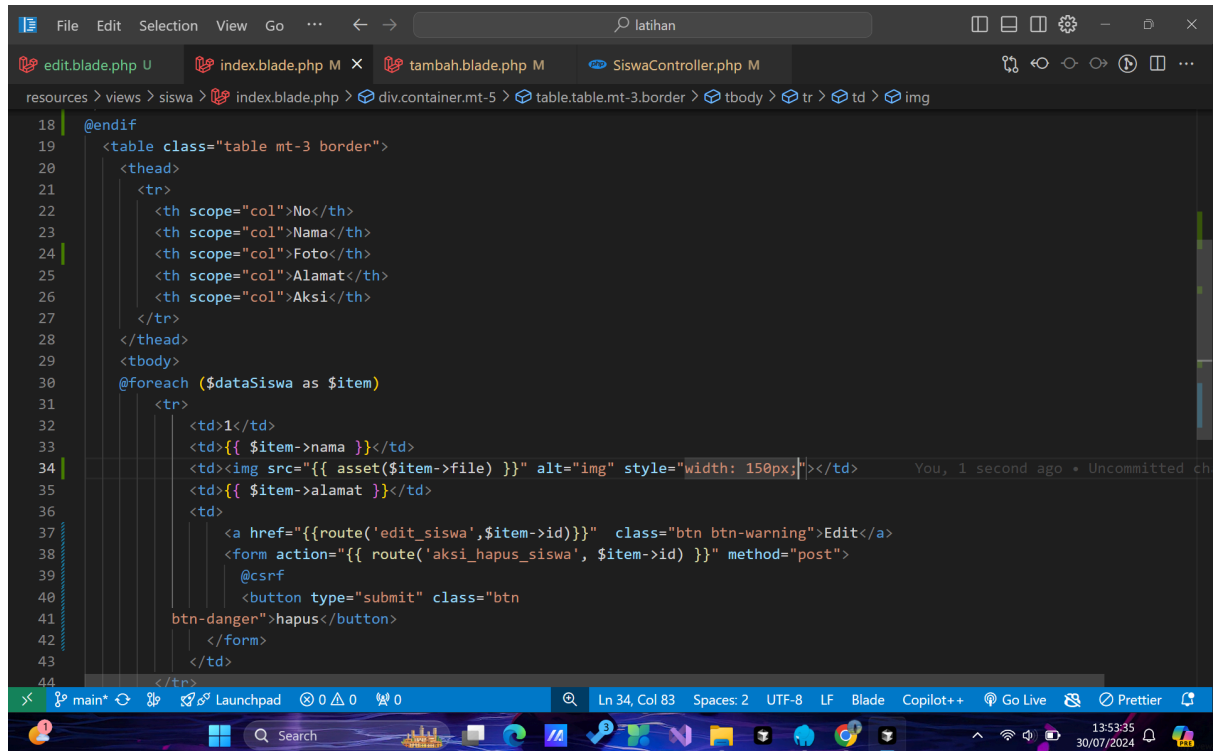

```
File Edit Selection View Go ... < -> latihan
edit.blade.php U tambah.blade.php M SiswaController.php M X
app > Http > Controllers > SiswaController.php > SiswaController > aksi_tambah
22     $filename = time() . '.' . $file->getClientOriginalExtension();
23     $file->move($destinationPath, $filename);
24     return $destinationPath . '/' . $filename;
25 }
26 public function tambah()
27 {
28     return view('siswa/tambah');
29 }
30 public function aksi_tambah(Request $request)
31 {
32     $file = NULL;
33     if ($request->has('file')) {
34         $file = $this->uploadFile($request->file, 'siswa');
35     }
36     Siswa::insert([
37         'nama' => $request->nama,
38         'alamat' => $request->alamat,
39         'file' => $file
40     ]);
41     return redirect()->route('siswa');
42 }
43 public function edit($id)
44 {
45     $data['siswa'] = Siswa::where('id', $id)->first();
46     return view('siswa/edit', $data);
47 }
48 public function update(Request $request, $id)
```

Menampilkan foto siswa

buka folder `siswa/index.blade.php`

lalu ubah menjadi seperti ini

Fungsi **asset()** dalam Laravel digunakan untuk menghasilkan URL lengkap ke file asset, seperti gambar, JavaScript, atau CSS yang ada di dalam folder public

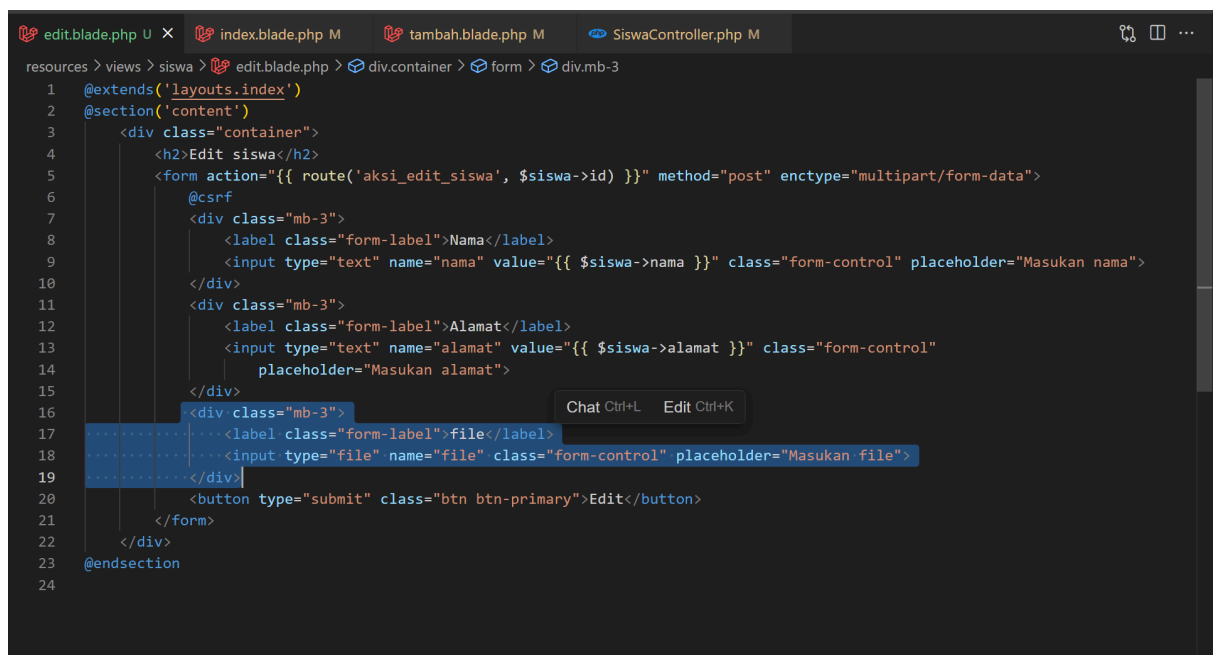

```
18 @endif
19 <table class="table mt-3 border">
20 <thead>
21 <tr>
22 <th scope="col">No</th>
23 <th scope="col">Nama</th>
24 <th scope="col">Foto</th>
25 <th scope="col">Alamat</th>
26 <th scope="col">Aksi</th>
27 </tr>
28 </thead>
29 <tbody>
30 @foreach ($dataSiswa as $item)
31 <tr>
32 <td>1</td>
33 <td>{{ $item->nama }}</td>
34 <td></td>
35 <td>{{ $item->alamat }}</td>
36 <td>
37 <a href="{{ route('edit_siswa', $item->id) }}" class="btn btn-warning">Edit</a>
38 <form action="{{ route('aksi_hapus_siswa', $item->id) }}" method="post">
39 @csrf
40 <button type="submit" class="btn
41 btn-danger">hapus</button>
42 </form>
43 </td>
44 </tr>
45 @endforeach
46 </tbody>
47 </table>
```

Mengubah foto siswa

buka folder **siswa/edit.blade.php**

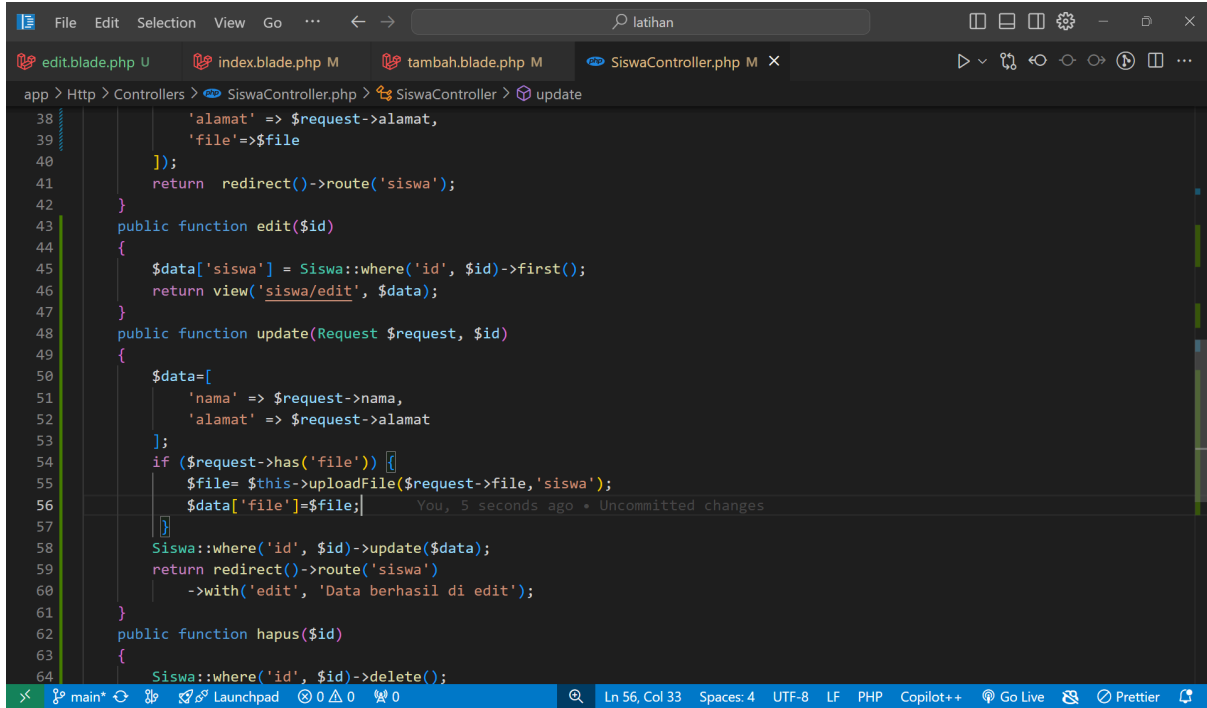

tambahkan attribute **enctype="multipart/form-data"** dan file input nya.

```
1 @extends('layouts.index')
2 @section('content')
3 <div class="container">
4 <h2>Edit siswa</h2>
5 <form action="{{ route('aksi_edit_siswa', $siswa->id) }}" method="post" enctype="multipart/form-data">
6 @csrf
7 <div class="mb-3">
8 <label class="form-label">Nama</label>
9 <input type="text" name="nama" value="{{ $siswa->nama }}" class="form-control" placeholder="Masukan nama">
10 </div>
11 <div class="mb-3">
12 <label class="form-label">Alamat</label>
13 <input type="text" name="alamat" value="{{ $siswa->alamat }}" class="form-control"
14 placeholder="Masukan alamat">
15 </div>
16 <div class="mb-3">
17 <label class="form-label">file</label>
18 <input type="file" name="file" class="form-control" placeholder="Masukan file">
19 </div>
20 <button type="submit" class="btn btn-primary">Edit</button>
21 </form>
22 </div>
23 @endsection
24
```

buka file **SiswaController.php**

ubah fungsi **update** menjadi seperti ini

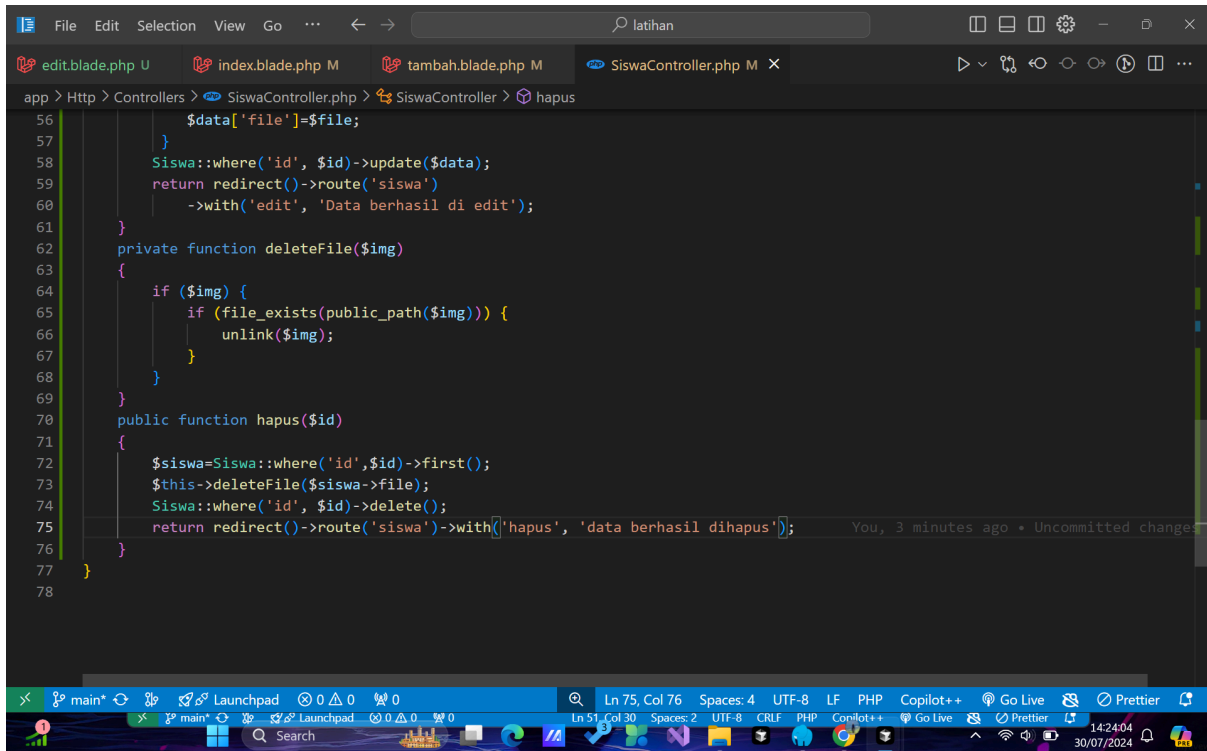

```
File Edit Selection View Go ... latihan
edit.blade.php U index.blade.php M tambah.blade.php M SiswaController.php M X
app > Http > Controllers > SiswaController.php > SiswaController > update
38         'alamat' => $request->alamat,
39         'file'=>$file
40     ];
41     return redirect()->route('siswa');
42 }
43 public function edit($id)
44 {
45     $data['siswa'] = Siswa::where('id', $id)->first();
46     return view('siswa/edit', $data);
47 }
48 public function update(Request $request, $id)
49 {
50     $data=[
51         'nama' => $request->nama,
52         'alamat' => $request->alamat
53     ];
54     if ($request->has('file')) {
55         $file= $this->uploadFile($request->file,'siswa');
56         $data['file']=$file;
57     }
58     Siswa::where('id', $id)->update($data);
59     return redirect()->route('siswa')
60         ->with('edit', 'Data berhasil di edit');
61 }
62 public function hapus($id)
63 {
64     Siswa::where('id', $id)->delete();
65 }
```

menghapus foto siswa

buka file **SiswaController.php**

buat fungsi baru **deleteFile** dan ubah fungsi **hapus** jadi seperti ini

```
File Edit Selection View Go ... latihan
edit.blade.php U index.blade.php M tambah.blade.php M SiswaController.php M X
app > Http > Controllers > SiswaController.php > SiswaController > hapus
56     $data['file']=$file;
57 }
58 Siswa::where('id', $id)->update($data);
59 return redirect()->route('siswa')
60     ->with('edit', 'Data berhasil di edit');
61 }
62 private function deleteFile($img)
63 {
64     if ($img) {
65         if (file_exists(public_path($img))) {
66             unlink($img);
67         }
68     }
69 }
70 public function hapus($id)
71 {
72     $siswa=Siswa::where('id',$id)->first();
73     $this->deleteFile($siswa->file);
74     Siswa::where('id', $id)->delete();
75     return redirect()->route('siswa')->with('hapus', 'data berhasil dihapus');
76 }
77 }
78 }
```
