

# Membuat Logout di laravel

buat route logout nya dahulu di file web.php di dalam middleware

```
Route::get('logout', [AuthController::class, 'logout'])->name('logout');
```

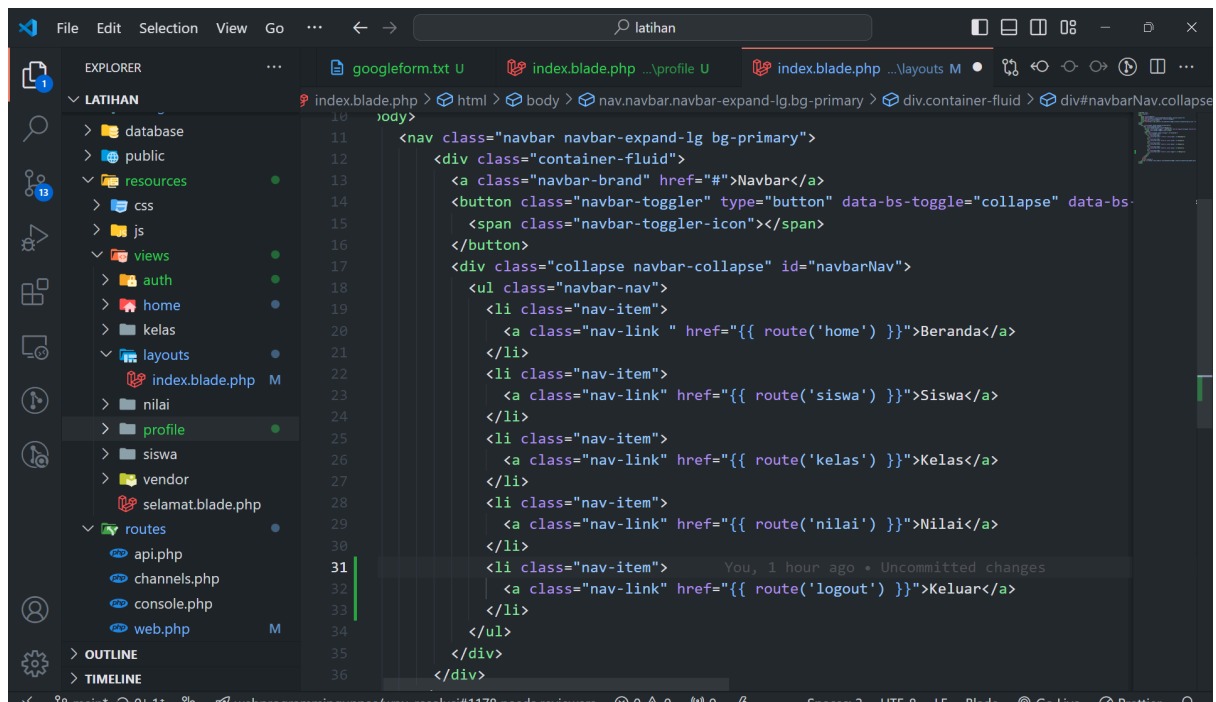

lalu buat fungsi untuk logout nya

```
x
public function logout(Request $request)
{
    Auth::logout();

    $request->session()->invalidate();
    $request->session()->regenerateToken();

    return redirect('/');
}
```

setelah itu tambahkan menu baru untuk logout nya

## Membuat Edit profile di laravel

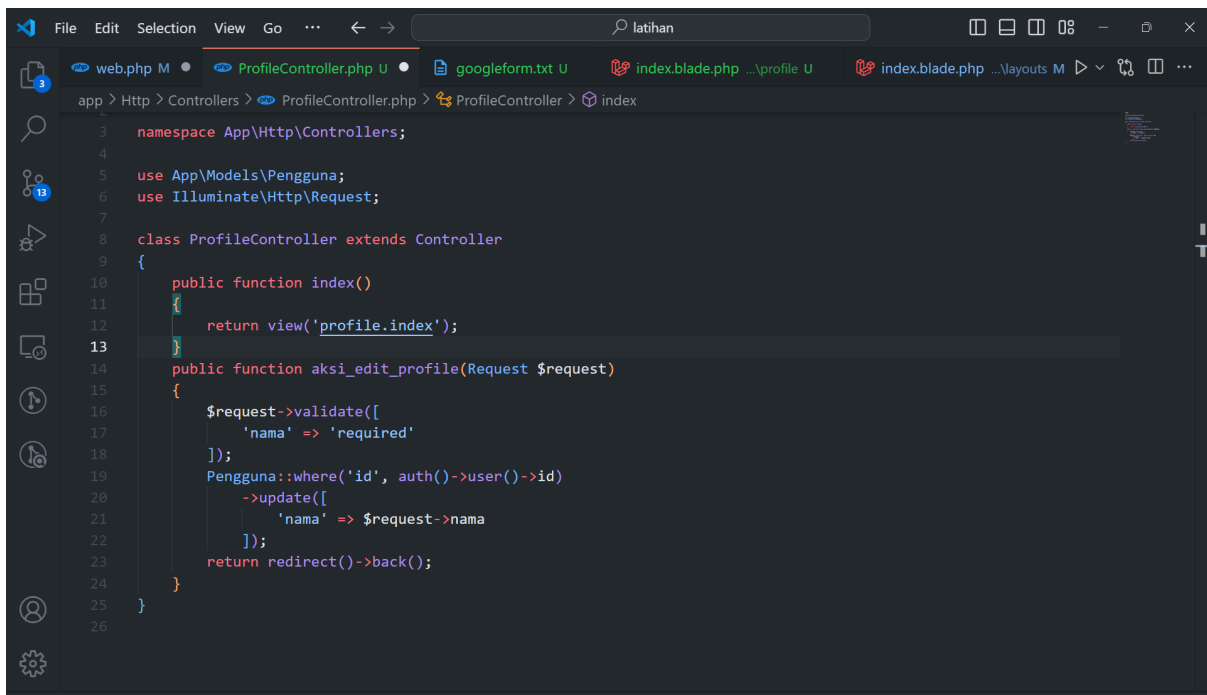

buat controller nya dahulu dengan menjalankan  
**php artisan make:controller ProfileController**

buat route untuk edit profile

```
// profile
Route::get('profile', [ProfileController::class, 'index'])->name('profile');

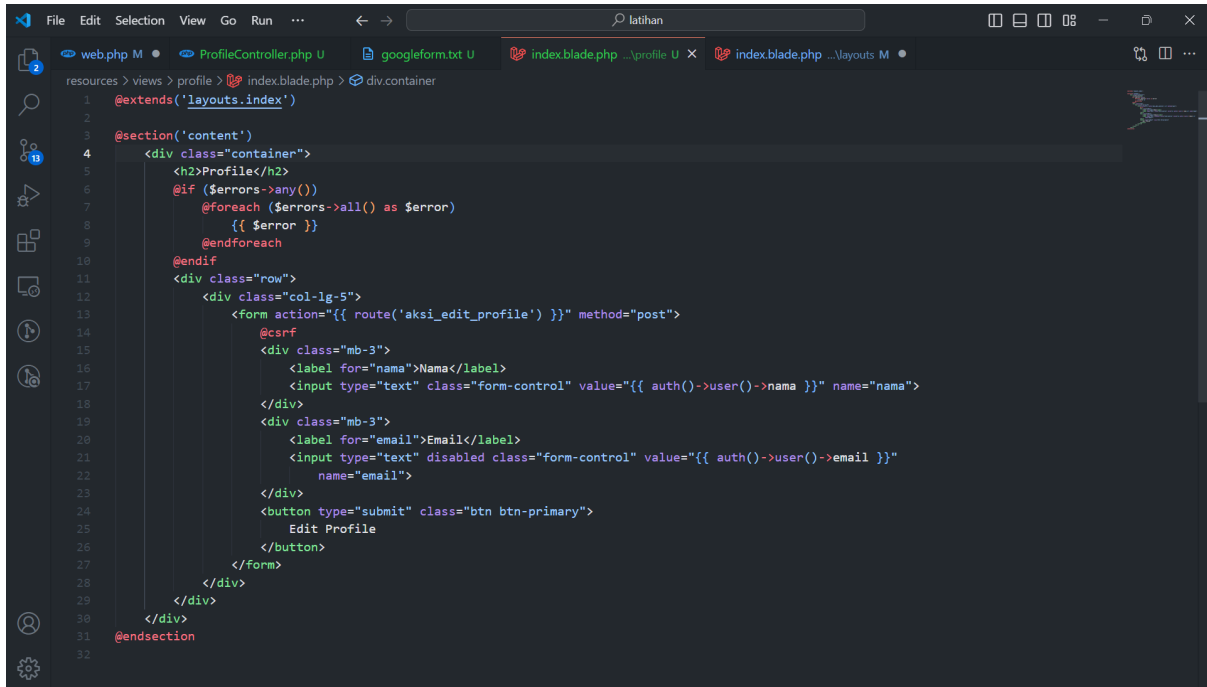

Route::post('aksi_edit_profile',
[ProfileController::class, 'aksi_edit_profile'])>name('aksi_edit_profile');
```

lalu buat fungsi untuk edit profile nya

```
File Edit Selection View Go ... < -> latihan
web.php M ProfileController.php U googleform.txt U index.blade.php ...\profile U index.blade.php ...\layouts M
app > Http > Controllers > ProfileController.php > ProfileController > index
3 namespace App\Http\Controllers;
4
5 use App\Models\Pengguna;
6 use Illuminate\Http\Request;
7
8 class ProfileController extends Controller
9 {
10     public function index()
11     {
12         return view('profile.index');
13     }
14     public function aksi_edit_profile(Request $request)
15     {
16         $request->validate([
17             'nama' => 'required'
18         ]);
19         Pengguna::where('id', auth()->user()->id)
20             ->update([
21                 'nama' => $request->nama
22             ]);
23         return redirect()->back();
24     }
25 }
26
```

setelah itu buat file untuk halaman edit profile di folder profile/index

```
1 @extends('layouts.index')
2
3 @section('content')
4     <div class="container">
5         <h2>Profile</h2>
6         @if ($errors->any())
7             @foreach ($errors->all() as $error)
8                 {{ $error }}
9             @endforeach
10        @endif
11        <div class="row">
12            <div class="col-lg-5">
13                <form action="{{ route('aksi_edit_profile') }}" method="post">
14                    @csrf
15                    <div class="mb-3">
16                        <label for="nama">Nama</label>
17                        <input type="text" class="form-control" value="{{ auth()->user()->nama }}" name="nama">
18                    </div>
19                    <div class="mb-3">
20                        <label for="email">Email</label>
21                        <input type="text" disabled class="form-control" value="{{ auth()->user()->email }}"
22                            name="email">
23                    </div>
24                    <button type="submit" class="btn btn-primary">
25                        Edit Profile
26                    </button>
27                </form>
28            </div>
29        </div>
30    </div>
31 @endsection
32
```
